WEB DEVELOPER

Front-end Developer | React-Js Developer | Web Designer

OBJECTIVE

Enthusiastic graduate with a Bachelor's degree in Instrumentation and Control Engineering, passionate about web design and development. Eager to contribute my technical skills to a dynamic team and further enhance my capabilities in the field.

EXPERIENCE

React.Js Developer   **August 2021 – July 2023**
Logicbuzz Infotech

- **Front-end development** using modern technologies like **ReactJs**, HTML, CSS, and JavaScript, BootStrap achieved high performance and garnered strong positive feedback.
- Employing advanced **SEO** techniques and metadata optimization led to a significant increase in organic traffic, while adhering to **DRY** principles streamlined debugging.
- Designing and developing **RESTful APIs** with facilitated seamless data exchange between the front-end and back-end.
- Collaboration with technical and design teams, tracked through **Git** and **Jira**, encompassed various tasks, including design, coding, reporting, and debugging.
- Implementation of **responsive web design** strategies, with a focus on SEO, ensured an excellent user experience across devices, leading to notable Lighthouse score improvements.

PROJECTS

1. **Admin Dashboard Template**
   - Developed an administrative navbar template employing **ReactJS**, HTML, CSS, and Bootstrap. This template boasts user authentication mechanisms, encompassing sign-in, sign-up, and account creation functionalities, all facilitated through **Redux**. Moreover, I've seamlessly integrated a dynamic data table via **API** integration. This inclusion enables users to perform actions like data insertion, updating, and deletion with ease, enhancing the template's utility for data management.

2. **Keeper App**
   Key Technologies: ReactJS, HTML, CSS3, JavaScript, material-UI
   - Developed a web application using **ReactJS** and **material-UI** library, letting users add notes and title.
   - Leveraged React **useState** Hook to track the application state.

3. **Weather Application**
   Key Technologies: HTML5, CSS3, JavaScript, OpenWeatherMap API, Geolocation API
   - Displayed the retrieved data from the OpenWeatherMap API with the appropriate weather description.
   - Integrated the Geolocation **API** to ask for user location permission as a pop-up notification on the web page.
   - Fetched background image from Unsplash, according to the location input from the user using **Unsplash API.**

4. **Bug-Tracker App**

   Key Technologies: Redux
   - Built an application to log and track the bug status for project reporting and bug state analysis.
   - Incorporated **Redux** store, defined actions, and created reducers for the personal project purposes.
   - Implemented the subscription and unsubscribe from the store according to the needs and according to the state change notification requirements.

5. **Foodie Delights E-commerce Site**
   - Constructed an e-commerce website using Bootstrap, HTML, CSS, and JavaScript.
   - Integrated shopping cart functionality and user authentication.

6. **Medicio Health Platform**
   - Developed a health information website utilizing Bootstrap, HTML, CSS, and JavaScript.
   - Created dynamic elements for a user-friendly experience.

7. **Restaurant Experience Website Github**
   - Created an interactive restaurant website with HTML5 and CSS3.
   - Employed CSS animations and transitions to enhance user engagement.

8. **Flex Website Github**
   - Designed a flex website using HTML5, CSS3, and Bootstrap.
   - Implemented responsive layout strategies for seamless user experience.

EDUCATION

Free Code Camp- Responsive Web Design Certification Program Certificate
   - **Diverse Project Scope**: My responsive web design projects span various complexities, addressing challenges like adaptive navigation menus and image optimization.
   - **Real-world Simulation**: These projects replicate real-world conditions, focusing on **UX**, accessibility, and cross-browser compatibility.
   - **CSS Proficiency**: I refine my CSS expertise through media queries and advanced techniques, such as CSS **Grid** and **Flexbox**, to create responsive layouts.
   - **Testing and Portfolio Building**: I thoroughly test my projects for performance and, at the same time, create a portfolio to display my web design skills and work.

Bootcamp Course of Web Development -Oscar Career Point   **July 2020-July 2021**
   - Attained hands-on experience in front-end web development.
   - Completed projects showcasing proficiency in web technologies.

Instrumentation & Control Engineering   **June 2015-May 2019**

Sarvajanik College of Engg & Tech, Surat, India

SKILL SUMMARY

   - Proficient in React-Js, HTML5, CSS3, JavaScript, Bootstrap, C, Python, Jira.
   - Strong understanding of responsive and user-centric design principles.
   - An effective team member with proven abilities to be a part of team during the project phase and guiding team members.
   - Familiarity with version control using **Git** and knowledge of **SEO** and website optimization techniques.
   - Problem-solving and analytical mindset.
   - Effective communication and collaboration abilities.
   - Quick learner and adaptable to new technologies.
